### **Technical data**

| Functional data    | Valve size [mm]                   | 1.5" [40]                                     |  |
|--------------------|-----------------------------------|---|--|
|                    | Fluid                             | chilled or hot water, up to 60% glycol, steam |  |
|                    | Fluid Temp Range (water)          | -22280°F [-30138°C]                           |  |
|                    | Body Pressure Rating              | 600 psig WOG psi                              |  |
|                    | Close-off pressure ∆ps            | 600 psi                                       |  |
|                    | Flow characteristic               | modified equal percentage                     |  |
|                    | Max Differential Pressure (Steam) | 35 psi  |  |
|                    | Flow Pattern                      | 2-way   |  |
|                    | Leakage rate                      | ANSI Class VI                                 |  |
|                    | Controllable flow range           | 90° rotation                                  |  |
|                    | Cv                                | 84  |  |
|                    | Maximum Inlet Pressure (Steam)    | 35 psi [241 kPa]                              |  |
|                    | Maximum Velocity                  | 15 FPS  |  |
| Materials          | Valve body                        | Bronze B584-C84400                            |  |
|                    | Housing seal                      | PTFE  |  |
|                    | Spindle                           | 316 stainless steel                           |  |
|                    | Spindle seal                      | RPTFE   |  |
|                    | Seat                              | RPTFE   |  |
|                    | Lock nut                          | stainless steel                               |  |
|                    | Pipe connection                   | NPT female ends                               |  |
|                    | Retainer                          | B584-C84400 bronze                            |  |
|                    | Ball                              | 316 stainless steel                           |  |
| Suitable actuators | Non-Spring                        | GMB(X)  |  |
|                    |                                   | PRB(X)  |  |
|                    |                                   | GRCB(X)                                       |  |
|                    |                                   | GRB(X)  |  |
|                    | Spring                            | AF  |  |
|                    | Electrical fail-safe              | PKRB(X)                                       |  |
|                    |                                   |   |  |

### Safety notes

• WARNING: This product can expose you to lead which is known to the State of California to cause cancer and reproductive harm. For more information go to www.p65warnings.ca.gov

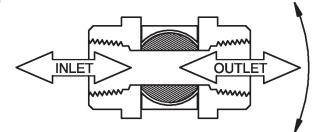

ApplicationThis valve is typically used in air handling units on heating or cooling coils, and fan coil unit<br/>heating or cooling coils. Some other common applications include Unit Ventilators, VAV Box re-<br/>heat coils and bypass loops. This valve is suitable for use in a hydronic system with variable flow.<br/>This valve is designed with MFT functionally which facilitates the use of various control input.<br/>Up to 35 psi steam

1/2" - 2" 600 PSIG WOG, Cold Non-Shock Federal Specification: WW-V-35C, Type II Composition: BZ

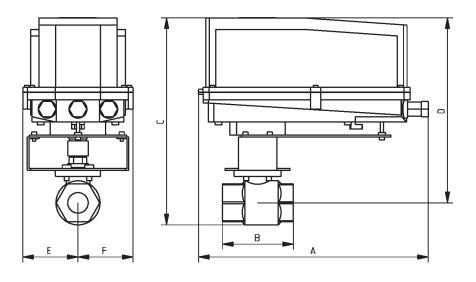

Style: 3

## X INSTALLATION NOTES

 $\bigwedge$  Provide overload protection and disconnect as required.

Actuators may be connected in parallel. Power consumption and input impedance must be observed.

Only connect common to negative (-) leg of control circuits.

A 500 Ω resistor (ZG-R01) converts the 4...20 mA control signal to 2...10 V.

 $\int_{16}^{16}$  Actuators are provided with a numbered screw terminal strip instead of a cable.

Meets cULus requirements without the need of an electrical ground connection.

# Marning! Live electrical components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
