

Security Enclosure Components

Description

You can order the components listed in this document separately for field installation of security enclosures or for replacement items. In addition to complete enclosures, we offer individual components. You also can order Battery Bracket and Tamper Switch Kits separately. The enclosures are designed specifically for security control requirements, and come with pre-engineered and pre-mounted studs for field installation of the battery brackets, as well as standard electrical conduit knockouts. The lift-off door comes with a lock and key.

Refer to the following catalog pages for the complete offering of Security Control Panel Assemblies:
