

R-131

# Precision Air Pressure Reducing Valve

## Description

The R-131 Precision Air Pressure Reducing Valve maintains pressure regulation within  $\pm 0.1$  psi ( $\pm 0.7$  kPa).

Refer to *R-131 Precision Air Pressure Reducing Valve Product Bulletin (LIT-718110)* for important product information.

## Features

- supplied in 1/4 in. pipe size
- lockable adjusting knob
- includes two auxiliary ports
- flow direction marked on bottom of valve
- mounts inline, or on a panel (with the optional mounting bracket R-130-100)

## Repair Information

If the R-131 Precision Air Pressure Reducing Valve fails to operate within its specifications, replace the unit. For a replacement valve, contact the nearest Johnson Controls® representative.
