

JCI Part #: ST-S24
MFG Part #: TTG200AS24
Stainless Steel Surface Mount Temperature Sensor

Application

The **TTG200AS24** provides precision room temperature sensing for BAS systems. The thermistor is bonded to a stainless steel plate and is insulated to reduce interior wall temperature influence. This sensor is intended for interior use only.

Model	Product Description
TTG200	Sensor Assembly
Code	Enclosure
AS	Stainless Steel Wall Plate
Code	Sensor
24	10,000 Ω Type 2, NTC Thermistor

Sensor Specifications

Operating Temperature Range	32°F to 221°F 0°C to 105° C
Material	¼" 304 Stainless Steel
Wiring & Connections	Two-wire twisted pair, black and white
Enclosure	N/A
Sensor Type	10,000 Ω Type 2 NTC Thermistor
