SBE-PREFAB: Pre-Configured Panels That Jumpstart Your Installation
The SBE-PREFAB series gives you a head start on your control system integration – delivering a pre-configured, high-quality solution that saves time, reduces labor, and ensures a clean, consistent installation every time.

**Ready to Work, Right Out of the Box**
Each SBE-PREFAB panel is designed and built with the control technician in mind. Standard features include:

- **NEMA1/IP20 enclosure** Indoor use.
- **Door locks are standard** Control access to your devices.
- **Factory-Wired 120 to 24 Vac Transformers** Power all your controllers and end devices reliably.
- **Convenience Receptacle** Built-in power outlet for your laptop, making commissioning and troubleshooting easier.
- **DIN-Rail** Universal mounting for controllers and components - no custom fabrication required.
- **Integrated Cable Management** Clean internal layout improves serviceability, and visual clarity.
- **High-DensityPowerRails** Terminate all your controllers and end devices quickly with organized, labeled rails.

Buillt with Trusted Brands We use top-tier, industry-standard components from names you already trust. This ensures not only long-term reliability but a quality product and installation.

Time is Money – We Help Save You Both Whether you're facing labor constraints, tight schedules, or demand a uniformed final product, the SBE-PREFAB line delivers.

The Result: A Professional-Grade Installation in Less Time
