PRIMARY FSG RELAYS

RM7890 Primary Controls

Replaces RA890F,G,H, & Requires Q7800 Subbase & R78 Amplifiers

- RM7890A1015** Automatic Primary Relay
- RM7890B1014** Automatic Primary Relay, Shutter Drive
- RM7890B1048** Enhanced Primary with VPS**

RM7895 Primary Controls

Replaces R7795A,B—R4795A,D & Requires Q7800 Subbase, R78A Amplifiers & ST Purge Cards

- RM7895A1014** Intermittent Primary Relay
- RM7895B1013** Intermittent Primary Relay with Air Flow Switch Check
- RM7895C1012** Interrupted Primary Relay
- RM7898A1000** Enhanced Primary with VPS**

RM7838A and B Semi-Automatic Primary Controls

Replaces R4138, Requires Q7800 Subbase, R78 Amplifiers & ST Purge Cards

- RM7838A1014** Semi-Automatic Primary Relay with Display
- RM7838B1013** Enhanced Primary Relay with Display

PROGRAMMER FSG RELAYS

RM7840 Programmer FSG Relay

Replaces R4140 & Requires Q7800 Subbase, R78 Amplifiers, ST Purge Cards

- RM7840E1016** Relay Module, 4-Wire Modulation, Proven High/Low Fire, ESP*
- RM7840G1014** Relay Module, 4-Wire Modulation, Proven Low Fire
- RM7840L1018** Relay Module, 4-Wire Modulation, Proven High/Low Fire
- RM7840M1017** Relay Module, On/Off, Proven Low Fire
- RM7840L1075** Enhanced Programmer with Purge & VPS**

RM7800 Programmer FSG Relay

Replaces BC7000 (includes keypad) & Requires Q7800 Subbase, R78 Amplifiers, ST Purge Cards

- RM7800E1010** Relay Module with Keypad, 4-Wire Modulation, Proven High/Low Fire, ESP*
- RM7800G1018** Relay Module with Keypad, 4-Wire Modulation, Proven Low Fire
- RM7800L1012** Relay Module with Keypad, 4-Wire Modulation, Proven High/Low Fire
- RM7800M1011** Relay Module with Keypad, On/Off, Proven High/Low Fire
- RM7800L1087** Enhanced Programmer with Keypad & VPS**

*ESP = Energy Savings Prepurge **VPS = Valve Proving System

Honeywell

S7800A1142 Enhanced Keyboard

Allows for programming the VPS and post purge as well as configuring of S7830 expanded annunciator terminals to match user system drawings, providing an aid for troubleshooting.

S7800A2142 Display Module

Allows for programming the VPS and post purge. Provides current system status and first-out annunciation and system diagnosis using a five-row by 64-column readout. The KDM is part of the 7800 series of microprocessor-based burner controls for gas/oil/coal or combination fuel single burner applications.

S7810M1003 ControlBus Module-MODBUS

Operates as ModBus RTU slave device with ability to remotely mount the S7800 Keyboard Display Module. It installs directly on the front of 7800 Series Relay Modules and provides ModBus communications bus interface with remote reset option.

HONEYWELL SLATE - Integrated Combustion Equipment Management!

A single platform for almost any application. With the revolutionary integration of configurable safety and programmable logic, SLATE is easily customized for virtually any commercial or industrial combustion application. In less time, and with far less complexity. With SLATE, your team can engineer custom solutions for a variety of markets without going back to the manufacturer. Purchase only the modules your application requires and choose how to use them.

FEATURES:

- It's modular—buy only the modules you need and choose how to use them with simple wiring commands
- Provides 24 VDC or 24 to 240 VAC flame safeguard
- Dual fuel capability; DIN rail mountable
- Designed to mount inside electrical enclosure as part of a system
- Flexible programming tools help you develop and implement differentiating applications more quickly
- Load your custom application kit with a PC for faster duplication
- SLATEXTOOL software install and license required

HONEYWELL SLATE COLOR DISPLAY - 10" Color LCD Display

R8001K1010

The R8001K1010 SLATE 10" Color Touch Screen Display provides users with the ability to create vivid application displays using web technology. The screen is web enabled, and with the SLATE Web Editor tool, creating screens is simple and easy.

FEATURES:

- Display screens are web pages served from SLATE Base Module
- Integrated view of SLATE system
- Standard Honeywell pages for Burner Control, Fuel Air Ratio, Limit and Base Modules

LME7 BURNER CONTROL

The burner control LME7 is a microprocessor-based unit with matching system components for the control and supervision of forced draft burners of medium to high capacity. Ease of installation, programming and commissioning are incorporated into a reliable, field proven control.

LFL FLAME SAFEGUARD

With an incomparable record for safety and reliability, the globally approved LFL Flame Safeguard continues to be one of the most widely used flame safeguards around the world. Siemens LFL burner controls provide burner sequencing and flame monitoring for the supervision of individual gas, oil, or dual fueled burners.

SQN7 CONTROL MOTOR

Designed to drive gas and air dampers for burners with small to medium capacities, the SQN7 Control Motor provides line voltage, floating control and optional feedback for low torque applications. Features include: line voltage floating or proportional control, optional feedback potentiometer, up to 22 in-lb torque, and an auxiliary switch.

LDU11 VALVE LEAK TEST SYSTEM

The Siemens LDU11 gas valve leak test control checks for leakage through the shutoff valves prior to burner start-up and/or immediately after burner shut-down. The cost-effective, easy to install LDU11 adds a substantial degree of safety to any combustion system.

SIEMENS LMV3

The LMV3 Linkageless Burner Management System sets an industry standard for cost-effective single or dual fuel burner controls—from easy installation, programming and commissioning to reliable, proven control. Effortless commissioning, simple programming, and easy installation allows for maximum ROI.

With the LMV3, Siemens forges new ground delivering a fully-integrated flame safeguard, linkageless system that is not only easy to install and use, but also provides improved burner performance and efficiency and ensures safe operation.

- Single and dual fuel versions
- Gas valve leak test on startup, shutdown, both or neither
- Proof of closure switch monitoring
- Programmable overlap of the pilot and main gas valves
- Programmable stops to pause startup sequence in: pre-purge, pre-ignition, pilot ignition, and main flame
- Adjustable purge timing up to 60 minutes

SIEMENS LMV5

The LMV5 Linkageless Burner Management System sets the standard high—from easy installation, programming and commissioning to reliable, proven control. With the LMV5, Siemens forges new ground delivering a fully-integrated system that is not only easy to install and use, but also provides improved burner performance and efficiency and ensures safe operation.

- Fuel to air ratio curve can easily be adjusted at any point in the firing rate
- 15 programmable points, with 4 independent positions including pre-purge, ignition, post-purge and standby
- User friendly menu system for fast programming, commissioning
- Worldwide approvals and technical support

RWF50 TEMPERATURE CONTROLLER

The RWF50 is used mainly for controlling the temperature or pressure in oil- or gas-fired heating plants. It is used either as a 3-position controller without angular positioning feedback or a continuous controller with analog output depending on the version. An external switch can be used to change to a 2-position controller for controlling 2-stage burners. The integrated thermostat function switches the burner on and off.

45UV5-1009	1" NPT Mount, 8' Lead Wire, Self-Checking, Explosion Proof

FIREYE INTEGRATED SCANNERS

Simplicity 65UV5

The Fireye 65UV5 flame scanner is a microprocessor-based flame scanner utilizing an ultraviolet tube-type sensor and an electro-mechanical self-checking shutter mechanism. The Fireye 65UV5 flame scanner incorporates an internal flame relay with a fixed ON/OFF threshold thereby eliminating the need for an external flame amplifier.

65UV5

Phoenix 85UVF

The Fireye Phoenix type 85UVF/IRF flame scanners are microprocessor-based devices utilizing a solid state flame detection sensor. The Phoenix flame scanners incorporate an internal flame relay with automatically set ON/OFF thresholds, thereby eliminating the need for a remote flame amplifier or flame switch.

85UVF

InSight 95IR/95UV/95DS

The Fireye InSight Type 95IR, 95UV, and 95DS flame scanners are microprocessor-based flame scanners utilizing solid state infrared (IR), ultraviolet (UV) or dual (IR and UV) sensors. The Fireye InSight Type 95 flame scanners incorporate an internal flame relay with adjustable ON/OFF thresholds, thereby eliminating the need for a remote flame amplifier.

FIREYE NEXUS - Integrated Flame Safeguard Capabilities!

NXF4000

The NXF4000 is an electronic parallel positioning and O2 trim combustion control system built into a compact, flexible user-configurable package. This controller will support sequencing/lead lag and up to 10 servo motors.

PPC6000

The Fireye PPC6000 is a state of the art stand-alone parallel positioning system for all types of liquid or gaseous fuel fired combustion systems. When combined with a Fireye flame safeguard system such as the Fireye BurnerLogix control, the PPC6000 offers the most compact and advanced parallel positioning system available.

PPC4000

The PPC4000 is an electronic parallel positioning and O2 trim combustion control system built into a compact, flexible user-configurable package. This controller will support sequencing/lead lag and up to 10 servo motors.

NXD410 Keypad Display

The NXD410 is a full text-based LCD display. Fifteen keys, including fast-access, one-push keys, provide information at a glance.

Servo Motors

Three servo motor sizes are available for the PPC4000. High accuracy 0.1 degree over 90 degrees resolution.

O2 Probe

Fireye's oxygen probe provides stack temperature and oxygen measurement. Available in three lengths with a low cost replaceable sensor. Oxygen trim automatically and continuously compensates for all the variables that affect efficient combustion.

Danfoss

Full range of drives from 208-240, 380-480 and 500-600 volts three-phase. Save time during commissioning while reducing programming errors that can lead to nuisance faults. Additional product features:

- Pre-configured at the factory for use with the Fireye Nexus product line
- Auxiliary contact blocks mounted and wired to terminals for Blower Motor Starter Interlock requirement
- One additional auxiliary contact block for profile selection when applied with the Fireye PPC series, mounted and wired to terminals
- Single line voltage input for start in both VFD and Bypass mode
- Line voltage contactors for drive output and bypass
- Dedicated Danfoss/Fireye wiring diagram clearly showing all required interconnecting wiring between the Nexus and the drive. Also includes a list of all option parameters changed by the factory for reference.

PHOENIX CONTACT ILC 2050 BI

The ILC 2050 BI is a Niagara-based controller that is ideal for mission-critical applications, including boiler rooms. It is compatible with the existing Niagara workbench used to program any Niagara controller. Its I/O is easily discoverable within the Niagara workbench with free rivers specific to this controller. The ILC 2050 BI includes the following features:

- Industrially-graded hardware
 - UL 508 certification
 - Shock-and-vibration testing
 - I/O port-to-port isolation
- Dense I/O expandability in a small footprint
- Modularity of I/O for mixing and matching signals as needed
- Time-optimized engineering using the Niagara 4 framework
- Support for all the main communication protocols used in building infrastructure automation
- Planning, engineering, and visualization in the Java-based Niagara 4 framework
- Easy extension of the Niagara 4 framework with self-programmed functions
- Four LAN, two USB, and two RS-485 interfaces are integrated
- Safe and reliable intelligent safety solutions protect personnel and machinery, and ensure high system availability

YASKAWA MATRIX DRIVE

The HV600 variable-speed drive (3-250 HP) is engineered for use in HVAC building automation applications requiring reliable motor control. The HV600 features your choice of IP20/UL Type 1, IP55/UL Type 12, or IP20/Protected Chassis protection classes. Every HV600 comes with HVAC application-specific software presets, a Hand-Off-Auto LCD keypad, a high-visibility Status Ring for quick visual indication of drive status, and a real-time clock for system accuracy.

- Simple steps for efficient commissioning
- DriveWizard® Mobile app for drive management on smart mobile devices
- Safe programming without main three-phase power
- Timer controls for starting, stopping, and speed changes
- Built-in building automation protocols
- Emergency Override for occupant safety in fire events

The Z1000U Matrix Drive incorporates matrix technology to directly convert input AC voltage to output AC voltage. The drive is ideally suited for HVAC applications providing **ultra-low harmonic distortion**, energy savings, and serviceability in a space-saving design. The Z1000U HVAC Matrix Drive was honored with the **Product of the Year Award** by Consulting-Specifying Engineer Magazine.

Z1000U

TESTO COMBUSTION ANALYZERS

300 Combustion Analyzer

The user-friendly and highly efficient testo 300 with smart-touch technology has numerous advantages, including but not limited to:

FEATURES:

- Operation via smart-touch - The smart-touch display responds immediately without any delay, allowing intuitive operation.
- Emailing of reports - The testo 300 enables the convenient creation of documentation directly on site, and the dictation function even saves you typing in the process. Send reports immediately via Wi-Fi.
- Keep an eye on all measuring values - You can see the system's parameters right away on the large 5" HD display.
- Get the results faster - Clearly structured menus for all relevant measurements are already stored in the measuring instrument and guide you efficiently through the application.
- Completely worry-free - It has quality sensor technology, measures high CO values up to 30,000ppm and comes standard with the longest warranty in the industry.

SEITRON AMERICAS ANALYZERS

S1500-P Portable Combustion Analyzer with Built-In Printer

S1500-P Analyzer with O₂, CO, CO₂, Efficiency, Excess Air, Draft, Pressure, Temp, Rechargeable Battery and AC Plug, 12" (300mm) Probe with 5' (1.5m) Dual Hose, ABS Case, Calibration Certificate, Operating Manual, Cheat Sheet, Water Trap, Paper Roll, 2000 Internal Data Storage, PC Software, Bluetooth TM Connectivity, Differential Pressure Manometer Kit (1 Hose), Automatic Outdoor Air Temperature Saving for ALL 90%+ Systems and Condensing Systems for TRUE Efficiency Calculations + iOS and Android App Included.

S1500-P

S4500-3 Portable Commercial/Industrial Emissions Analyzer

S4500-3 Analyzer with O₂, CO, Standard NO/NO_x Gas Sensors, Upgradable to 4th Gas Sensor. Efficiency, Excess Air, Draft, Pressure, Temp, Rechargeable Battery and AC Plug, 12" (300mm) Probe with 5' (1.5m) Dual hose, ABS Case, Calibration Certificate, Operating Manual, Cheat Sheet, Water Trap, Paper Roll, 2000 Internal Data Storage, PC Software, Bluetooth TM Connectivity, Differential Pressure Manometer Kit (1 Hose), Automatic Outdoor Air Temperature Saving for ALL 90%+ Systems and Condensing Systems for TRUE Efficiency Calculations + iOS and Android App Included.

S4500-3

Novo Portable Combustion Analyzer

The Novo Combustion Analyzer is designed to make combustion analysis quick and intuitive. Robust, reliable, precise. The Novo inherits the tradition of the Seitron analyzers and joins it with renewed software and hardware in order to offer a device easier to use. Main Features: With or Without Build-In Printer, 7" Touch Display for Easy Menu Navigation, Up to 4 Gas Sensors Including Low NO_x, Long-Life O₂ Sensor and High-Range CO With Dilution Pump, Dedicated Probe With One Simple Connection, Integrated Water Trap with LED Backlight for Easy Maintenance, Simultaneous Measurement of Gas and Combustion Results, Dual Range Sensor Technology, and More.

Novo Series

DUNGS PRESSURE SWITCHES

The GAO-, GMH- and GML-A4... ventless pressure switches are adjustable pressure switches for automatic burner controls. These pressure switches are suitable for making and/or breaking a circuit when the medium pressure changes relative to the set point. The set point can be set in the field by an adjustable dial with an integrated scale. Test nipple integrated in metal housing to verify set point.

HYDRAMOTOR GAS VALVES

The normally-closed aluminum body valves provide main line gas shutoff and control for boilers, furnaces and ovens. Also with flanged cast iron body for pipe sizes up to 6".

Actuators

AHD Series Actuators have been replaced with the E Series. The valve body must be changed as the new style will not fit on the old body style.

ACTUATORS AND VALVES

Designed to install faster, operate safer, and deliver proven reliability, Siemens VG Series Single and Double Gas Valves combine with SKP Series Electro-Hydraulic Actuators to provide gas safety shutoff, constant pressure regulation and air/gas ratio control.

To meet all of your application needs, VG Series Gas Valves are available in the following sizes:

- 1-1/2 to 3" threaded double valves
- 4 to 6" flanged double valves
- 1/2 to 3" threaded single valves

VGG10.254U	1" Gas Valve Body
VGG10.404U	1-1/2" Gas Valve Body
VGG10.504U	2" Gas Valve Body
VGG10.654U	2-1/2" Gas Valve Body
VGG10.804U	3" Gas Valve Body

Providing gas safety shutoff control for industrial and commercial burner applications, all SKP Actuators deliver reliable and safe on-off control:

- Proof-of-Closure (POC) Over Travel to ensure safety
- Modular design and quick connect wire terminals for fast installations
- Extremely low 13.5 VA power consumption

SKP15.011U1	On/Off Safety Shut Off Valve Actuator
SKP25.011U1	On/Off Safety Shut Off Valve Actuator w/(SPDT) Proof Of Closure Switch
